BitDraw is a new platform, that will be built using the Ethereum blockchain

BitDraw.online will be a smart lottery platform created for the \$103 billion lottery industry which will replace traditional lottery methods using disruptive technology while providing 100% anonymity for consumers

The lottery industry is one of the biggest in the world. Despite the impressive figures, banks and financial institutions have road-blocked businesses and individuals in the industry making payments expensive and insecure.

The BitDraw solution will solve three major problems for businesses, individuals and consumers of the lottery industry: eliminate large fees, guarantee security of funds and provide 100% anonymous transactions.

BitDraw will be managed by entrepreneurs and businessmen from the lottery industry. Their extensive experience is coupled with financial specialists and blockchain experts. Together we are going to set up a strong foundation for a platform which can change payment systems for every lottery industry participant.

Token sale will take place between the 23rd of August 2018 to 29th of November 2018. The sale will take place through the official website BitDraw.online. The company will burn any unsold tokens which would instantly increase the value of BitDraw. We are in discussion with traditional lottery industry to use our platform and have already pledged to use BitDraw upon its launch.

Through BitDraw Platform, participants will have the opportunity become a millionaire every month by participating a raffle draw using the simple three step process . BitDraw will provide the user with the possibility of using the platform in a number of ways from choosing lucky tickets, requesting for donations or payments and the insertion of advertising sponsors.

The project aims to overcome the bureaucratic and economic obstacles within this industry and reward users for simply using the platform.
The BitdDaw platform is unique both in the details and additional services it offers.

This is the first platform which will be purely dedicated to replace the traditional method of wining lotteries around the world.

VISION

Our vision is to create a new revolutionary Online lottery platform that is unlike any other traditional lottery systems

BitDraw will be the new point of reference for the lottery market and will be fully developed using the blockchain technology. Using the blockchain affords BitDraw with the means to be decentralized and be more community – based compared to its traditional competitors. Currently, users had to be in the country if they want to participate in any kind of lottery. Bitdraw aims to solve this problem once and for all by creating a decentralized platform with complete transparency and quality audits.

A holistic approach and choice is given to the user, to select monthly draw, select lucky numbers and chance to become a monthly millionaire. By protecting users privacy, platform enables to reserve winning numbers and participate the draw.

We have already planned to create a beta version of the platform, there users will be able to see how the system intended work. (only users with BTDW tokens can get access to early preview)

DISCLAIMER

BitDraw (also referred to as 'BTDW') does not guarantee the accuracy of conclusions and statements reached in this white paper.

Moreover, this white paper is provided "as is" with no representations and warranties, express or implied, whatsoever, including, but not limited to: (i) warranties of merchantability, fitness for a particular purpose, title or non-infringement; (ii) that the contents of this white paper is free from error or suitable for any purpose; and (iii) that such contents will not infringe third-party rights. All warranties are expressly disclaimed.

BitDraw and its affiliates expressly disclaim all liability for and damages of any kind (direct or indirect, including loss of profit) arising out of the use, reference to, or reliance on any information contained in this white paper, even if advised of the possibility of such damages.

Under no circumstances will BitDraw or its affiliates be liable to any person, entity, partners, partner's customer or end-users for any consequential, incidental, direct, indirect, special or punitive damages, including without limitation damages for lost profits, revenues, lost business or loss of use of products whether or not BitDraw has advised it in this white paper or any of the content contained herein, that such damages will or may occur, and whether such damages are claimed based on breach of contract, negligence, strict liability in tort or any other legal or equitable theory. No action regardless of form, arising out of this white paper may be brought against BitDraw.

! Current Issues to be rectified

In order to participate any traditional lottery users had to be in the country and should have valid proof of purchase to claim the winning price, as well the risk of getting published with biodata which leads to life threatening and stole of money. Moreover, the third party participation and commissions of fund transfers.

BitDraw, using the Ethereum blockchain, finally wants to resolve these problems that users face when participating traditional lottery systems.

BitDraw will verify users from their depositing address as valid submission and winning user will have their price in no time using the power of blockchain.

In addition, KYC process will be mandatory when registering the users on the platform.

It is time to the next level!

Think about last time you bought a lottery ticket. You need to constantly look at media or any other source to find out the winning lottery and you have to make sure that ticket is retained to claim the winning price. In digital tickets, you need to verify your identify before claiming the price . Thanks to our innovative lottery draw platform these issues will no longer exist and monthly price will be automatically transfers to users deposited address without any verification.

ETHEREUM

Ethereum is a decentralized Web 3.0 platform for creating and publishing peer-to-peer smart contracts.

Ethereum is different from Bitcoin because it allows you to create smart contracts that can be described as highly programmable digital money. Contrary to many other cryptocurrencies, Ethereum is not only a network for the exchange of monetary value but a network to run contracts based on Ethereum.

These contracts can be used safely to perform a large number of operations, such as; electoral systems, registration of domain names, financial markets, crowdfunding platforms, intellectual property, etc.

BitDraw reserves the right to use one or more blockchains within its project. This will allow us to be totally decentralized without depending on a single technology.

TOKEN INFORMATION

The BitDraw Token (symbol: BTDW) will be used as currency within our platform and will therefore be used for sponsorships, donations and purchases.

Using the Ethereum blockchain, BTDW community will be able to receive payments safely and quickly, thus eliminating the annoying problems and slowness of the fiat currencies.

BitDraw is a long term project, all our calculations have been made in order to guarantee an “uninterrupted” production flow, (all this regardless of the various market fluctuations).

Our token will be essential for,

- Sponsorship
- Making a donation
- Purchasing a song
- Voting
- Buying tickets
- Purchasing merchandising.

In order to guarantee the adoption of our platform, we have implemented a Smart Contract that will reward the new subscribers, those who invite other users and who will create creating various contents of various types.

TOKEN DISTRIBUTION

The token distribution will be designed to increase community benefits and provide long-term incentives.

PRESALE & PUBLIC SALE

Presale & Public Sale - 70% of the BTDW tokens will go on sale. This will permit the development of the application and the expansion of the project. Unsold tokens of the Public Sale will be BURNED to guarantee the stability and maintenance of the value of our currency.

BOUNTY

The Bounty Program is born from the need to create a strong and sustainable community. In this case, all users who bring added value to BitDraw will be rewarded with BTDW tokens.

ADVISOR

In order to guarantee the success of our crowdfunding, we have reserved a 7% fund for our advisors and related costs.

RESERVE

The reserve fund is necessary to guarantee "long-term" survival of the project

TEAM

We have allocated 10% of the BTDW Tokens to the Founder and the Team. This fund will be blocked for a period of 6 months, at the end of the 6 months the BTDW tokens will be unlocked in batches of about 2-3% per month.

USE OF FUNDS

In order to be able to manage and exploit the funds available in the best way, BitDraw intends to use them according to a strategy and a well-studied plan.

EXPANSIONS AND BUSINESS DEVELOPMENT

We aim to expand globally in other countries, starting from Canada followed by UK & Asia markets and eventually extending to all countries that request to participate on lottery platform.

TECHNOLOGIES AND LOGISTICS

The blockchain is a sector that is still developing. Investing heavily in new blockchain technologies will allow us to keep our project in a decentralized way. Three locations have been identified of establishment in Europe for the business. All the three locations are geographically strategic positions for the partnership network that are already active and linked to the famous lottery world.

RESEARCH AND DEVELOPMENT

To do this we need to improve and develop our platform through technical and strategic improvements, acquiring and developing new activities that platform can offer to our Community and , licenses, mergers and collaborations collaborate with other partner companies.

MARKETING AND PROJECT

The fund related to Marketing & PR fund are the most important of the whole project . An unknown application is an unused application. Therefore, a part of this fund will be used to enhance the costs of our marketing strategy. Precisely for this reason we intend to push our marketing as much as possible, in this way we will be able to aim at connecting to our customers with the largest number of users, consequently achieving our goal. This fund will also be used to invest heavily in events, sponsorships, contests that are related to artists, public relations, advertising campaigns, social media campaigns and newsletters. Any means necessary to expand the brand and achieve our goal will also be considered.

TOKEN DETAILS

Symbol	BTDW
Role	Token utility used to get access to services within BitDraw
Accepted Payments	ETH / Crowdsale through Smart Contract
Total Supply	35,000,000 BTSDW / All unsold tokens during the public sale will be burned
Private Sale	July, 2018
Public Token Sale	August, 2018
Tokens	35,000,000
Available	Public Token Sale: 25,000,000
ICO Price	1 ETH = 1500 BTDW
Soft Cap	3,500 ETH
Hard Cap	17.000 ETH
